

## NEW ACCESSORIES FOR THE EKA COMPACT LINE

The Compact range is enriched with new accessories that, in just 50 cm wide, will make even more complete and performing the new Eka compact ovens.

The **condensation hood EKKC 6 C**, designed to ensure a perfect ventilation in the kitchen thanks to an automatic operation system which results in great ease of use and maximum efficiency. The hood in its interior accommodates: a fan whose speed is automatically controlled: to extract the steams which escapes from the opening of the ovens and during its normal operation; and the condensing chamber, designed to prevent any accumulation of water, ensuring safety and hygiene.

The **tables with supports EKTS 611 C** (for compact oven 6 trays EKF 611 CTC) and **EKTS 1011 C** (for compact oven 10 trays EKF 1011 CTC) give order and practicality at every working environment. Made of stainless steel and equipped with supports for respectively contain 6 (for model EKF 611 CTC) and 4 (for model EKF 1011 CTC) 1/1 GN trays or grids, they combine versatility and robustness and provide the ideal support for the ovens of the Compact line.
